Thermologika® Design

- Elegant and modern design to suit any room.
- Ideal for domestic and commercial applications where instant heat is required.
- Available in 5 colours and various finishes.
- Can be tilted by approx. 20° to direct the infrared rays towards the area you wish to heat.
- Black die-cast aluminium side panels.
- Grille constructed using stainless steel rods.
- 3 infrared lamps, each with a power of 600 W, for heating by radiation.
- Terminal box for electrical connection housed at the rear on the left-hand side.
- Time required to reach full power 30".
- 3 power levels can be selected using a pull cord: 600 W - 1200 W - 1800 W.
- Option of controlling the individual lamps using external switches and isolating the commutator when performing electrical connection.
- Wall installation with minimal dimensions thanks to sliding brackets and plugs secured with a safety screw.
- Insulation class: Cl.I. 

Accessories:

- Thermologika® Design bracket kit for installation of 2 lamps in series or parallel: code 22496.
- Quartz tube: code 22985.

Design: Volpi Design
